

## **New Depot Recycling Program**

Effective February 6<sup>th</sup>, 2008 a NEW recycling depot program will commence in the County of Peterborough. The depots will have available:

### **FIBRES**

One bin for fibres which will consist of:  
Fine paper, newsprint, cardboard & box board.

### **CONTAINERS**

One bin for containers which will consist of:  
cans, plastic bottles, and glass.

The benefits of our new recycling depot program for the County of Peterborough residents are as follows:

- Less sorting of recycling content.
- The County of Peterborough will be able to collect more recycling in our bins with the new recycling program which means we can go a longer time period before we need to empty our bins.
- The County of Peterborough will begin collection of depot recycling in compactor trucks which will allow Environmental services to lower its operating costs which reduces the burden on our hard earned tax dollars.
